

45kVA~2000kVA
CE $\underset{\text { compliant }}{\text { RoHS }}$

## Interfaces

## Applications

O Laboratory/Certification Bureau
O Electric Vehicles
O Renewable Energy
O Motor \& Compressor

## PAS Series

PAS Series product is developed for renewable energy related applications. It can simulate the various grid conditions and related test standards. Especially the voltage or frequency transient simulation test feature, it is very suitable for production, quality verification, research and development.It also builds in with Low Voltage Ride Through Test (LVRT) test function, step mode and gradual mode programmable capability.

PFV Series is a new generation of programmable AC power supply, with four quadrant energy feedback function.
This unit not only provides power to the EUT, but also sinks the power back to the grid system which is very useful for grid tie devices testing applications.
The maximum output power for PAS series is up to 2000 kVA , and the PFV series is up to 200kVA. The output voltage range is $0 \sim 300 \mathrm{VL}-\mathrm{N}$ and the standard output frequency is $45 \sim 65 \mathrm{~Hz}$ continuously adjustable (optional 40~70Hz).

## Regenerative Function

PAS series is a four-quadrant AC power source which is capable to be a power source or sink the power from the EUT back to the grid system with $90 \%$ efficiency. It is suitable for PV Inverter test, EV charger test or other grid tie devices test.

Build in with Low Voltage Ride Through (LVRT) test graph and it is very suitable for IEEE-1547 or BDEW related standards compliance test.

## Product Features

## Low Voltage Ride Through (LVRT)

## A Variety of Builtin Programmable Features

PAS/PFV series has a number of programmable features that can effectively and accurately simulate a variety of power abnormal conditions or disturbance. Through the built-in step and gradual mode, users can simulate voltage and frequency single-step or continuously changes, such as voltage and frequency ramp up/ ramp down, instantaneous changes, and so on. Phase angle and three phase independent adjustment function can be used for simulating three phase imbalance and further test the reliability of the EUT. With low voltage ride through and regenerative function, PAS series is suitable for PV Inverter, Bi-directional EV charger, Energy Storage System as an all purpose grid system simulator.

## ORDERING INFORMATION :

PAS-F Series three-Phase Output (45kVA - 200kVA)

| Model Number | Description |
| :---: | :---: |
| PAS-F 33045 | Regenerative Grid Simulator (45kVA/300V/45-65Hz, Including LVRT Testing) |
| PAS-F 33060 | Regenerative Grid Simulator (60kVA/300V/45-65Hz, Including LVRT Testing) |
| PAS-F 33075 | Regenerative Grid Simulator ( $75 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including LVRT Testing) |
| PAS-F 33100 | Regenerative Grid Simulator (100kVA/300V/45-65H, Including LVRT Testing) |
| PAS-F 33120 | Regenerative Grid Simulator (120kVA/300V/45-65Hz, Including LVRT Testing) |
| PAS-F 33150 | Regenerative Grid Simulator (150kVA/300V/45-65Hz, Including LVRT Testing) |
| PAS-F 33200 | Regenerative Grid Simulator (200kVA/300V/45-65Hz, Including LVRT Testing) |
| PAS-F 001 | Soft Start Function |
| PAS-F 002 | GPIB Interface |
| PAS-F 003 | Ethernet Interface |
| PAS-F 004 | USB Interface |
| PAS-F 005 | Output Frequency $40-70 \mathrm{~Hz}$ |

## PFV Series three-Phase Output (45kVA - 200kVA)

| Model Number |  | Description |
| :--- | :--- | :--- |
| PFV-33045 | High Power Programmable AC Power Source $(45 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33060 | High Power Programmable AC Power Source $(60 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33075 | High Power Programmable AC Power Source $(75 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33100 | High Power Programmable AC Power Source $(100 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33120 | High Power Programmable AC Power Source $(120 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33150 | High Power Programmable AC Power Source $(150 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-33200 | High Power Programmable AC Power Source $(200 \mathrm{kVA} / 300 \mathrm{~V} / 45-65 \mathrm{~Hz}$, Including Regenerative Function) |  |
| PFV-001 | Soft Start Function |  |
| PFV-002 | GPIB Interface |  |
| PFV-003 | Ethernet Interface |  |
| PFV-004 | USB Interface |  |
